### DETAILED ACTION

1. Claims 34,35 are pending. No drawings filed.

#### *Claim Rejections - 35 USC § 112*

2. The rejection of claims 34,35 under 35 USC 112, 1<sup>st</sup> paragraph is dropped. Applicants remarks are persuasive.

#### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 34,35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Aicher et al and Littlefield et al USP 6214865 B1 (references cited at page 2 of the specification).

Aicher et al teach halichondrin B as an antitumor agent in vivo and in vitro. See page 3162 column 1.

Littlefield teach halichondrin analogues combinable with other ingredients. See column 128 lines 43-55.

Applicants are combining two (2) compounds to perform the same function each performs individually. It is prima facie obvious to combine two or more compositions/compounds each of which is taught by prior art to be useful for the same purpose in order to form third composition that is to be used for very same purpose. It is well within the purview of the skilled artisan to administer two or more agents. Combination therapy is well known. Thus, claims directed to a composition that require no more than mixing together of conventional anti-tumor agents set forth prima facie obvious subject matter. In re Kerkhoven, 626 F.2d 846, 850, 205 USPQ 1069, 1072 (CCPA 1980).
